

### Industrial Trends - December 1991

#### No upturn in industrial production in the third quarter of 1991

September 1991 saw **no upturn** in industrial production in the European Community (EUR12). For all types of goods (intermediate, capital and consumer goods) there was a slight fall in Community production in September. The EUR12 **production index**, adjusted for the number of working days, is currently estimated at 117.0 (1985 = 100) for September 1991, representing a fall of 1.1% compared with September 1990. After seasonal adjustment, the estimated index for September 1991 is 113.6, which compares with 113.0 in August 1991. The seasonally-adjusted figure for EUR12 **production** in the third quarter fell by 0.7% compared with the second quarter in 1991, and for manufacturing (excluding mining) the corresponding fall was 1.4%. **There is therefore no sign of an upturn.**

In the **USA** there was a slight recovery in industrial production (quarter-on-quarter growth rate of 1.2%), while in **Japan** the situation was one of stagnation (quarter-on-quarter growth rate of 0.4%).

When **each member State's** seasonally-adjusted production index for industry as a whole for the last three months (third quarter) is compared with that for the previous three months (second quarter), different rates of change do emerge at national level, but here too the general trend is towards **stagnation** (the figures in brackets are for manufacturing): Ireland 4.7% (4.7%), Denmark 2.3% (2.3%), United Kingdom 1.0% (-0.8%), France 0.3% (0.5%), Germany -0.9% (-1.8%), Italy -1.3% (-1.4%), Netherlands -2.9% (-1.0%).

There was a sharp deterioration in the situation in the **European automobile industry**: whilst production in the second quarter of 1991 was up 1.6% compared with the first quarter, it fell in the third quarter by 1.7% (France, +7.6%; United Kingdom, -1.7%; Italy, -2.4%; Germany, -3.7%).

**Producer prices** in the European Community (calculated in ecus) for capital and consumer goods continued to increased by more than 3%, the position in September 1991 remaining the same as in June, July and August. For intermediate goods, however, there was a smaller price increase: 1% in September. As a result of this, there was a **slight decline** in the rates of change of prices in industry as a whole.
